

Our quality management system aims to help our company implement the best work practices to meet the requirements of its clients and to ensure the stable operation of the company's management system.

To fulfil our intentions in the area of quality management, we:

- are aware that a bold, determined and open employee is our greatest asset.
- ensure that our introduced and maintained quality management system and our liabilities toward it are understood by our employees and implemented in their daily work.
- identify and comply with the binding external and internal regulatory requirements in the area of quality management.
- analyse our performance in the quality management area, manage risks to determine areas needing improvements and continuously perfect the quality management system.
- make sure that high-quality solutions are provided to customers by working with material suppliers and other cooperation partners because one of the most important goals set for our project is to have satisfied customers whose wishes are completely understood and fulfilled.
